

SPECIFICATION:

p. 4, line 2

The tapered configuration of the wedge shaped modules allow for the inside rim of the hat or cap to ~~follow~~ follow the contour of a user's ~~head~~ head at the back and gradually distance the rim from the head as it goes along the sides of the head until reaching the forehead where the wedge shaped modules end and the forehead clearing begins.

p. 6 line 10

The the wedge shaped module (12) can be sold by themselves or integrated into hats or caps (22) at the manufacturing site of hats and caps (22) wherein the pile strip (14) could preferably be sewn in or glued and sewn or ~~simply~~ simply glued.

p. 6 line 13

The wedge shaped module (12) does not need to be more than about ½ inch at its thickest part and ~~rarely~~ no more than 1 inch wide.
